Of Ladies' Tailored Waists, very complete and at popular prices. Several styles to select from in broad-cloth, at

\$4.95 \$5.95 \$7.50

What about your new Corset for Fall? A full line of Nemo Flex combinations also a line for juniors. Look them over and be fitted if you can.

What about your Fall Hat? All colors and styles to select from. The largest range I ever carried.

MRS. THERRIAU

## Champion Theatre

Friday and Saturday, Sept. 23-24

Gene Stratton Porter's  
Monumental Epic of the American Family

## "LADDIE"

What a Show for This Week!

The greatest work of America's best loved author. Intense drama! Pivotal pathos! Delightful comedy! Dynamic situations! A crashing climax! All the marvellous characters that made the novel the greatest seller of the age, brought vividly to life in a picture you'll never forget. The call of the big city—What boy can resist it? All his brothers had heard it and one by one responded until the care of the farm was left to Laddie. What romance or compensation could he find in tilling the soil? Could the little aristocrat, she whom they called "The Princess," stoop to notice the lowly farmer boy who worshipped her? The answer is told in Gene Stratton Porter's great story of Youth and Love?

Coming Next Wednesday, with the Arcadian Orchestra,  
"The Country Beyond."

Coming Next Friday and Saturday: Tom Chaney in  
"Mr. Wu."

### Lacal and General

Miss Nettie Lobban, of Regina, is visiting with friends and relatives in this vicinity.

Granum is the latest addition to the list of towns where the schools are closed owing to the infantile paralysis epidemic.

The roads in the vicinity of Champion have been very rough since the recent heavy rain, and it will be some time before they will be in good condition again.

The Cosgrave government would appear to be leading in the elections in Ireland, although it will still be some days before definite results can be announced.

A meeting of the council of the Municipal District of Harmony was held on Saturday evening. A large number of accounts were passed in addition to the business of the day.

Mr. and Mrs. W. S. Ryan, Mrs. W. C. Hoskins, Mrs. J. M. Moffatt and Mrs. G. M. Campbell attended the 6th anniversary of the wedding of Mr. and Mrs. J. McLeod, at Brant, on Friday last.

Flowers are still blooming in the gardens in town, although in many places there are evidences of light frosts. The general opinion still leans to the belief that no damage has been done to the wheat.

With the Dempsey-Tunney fight over there will be an opportunity to discuss lines of sport which have perhaps less local interest but which are vastly more importance to the lives of residents in this province.

While Champion is still immune from infantile paralysis, chickenpox has led to the modified quarantining of some premises in town. It is not anticipated that much difficulty will be experienced in confining the outbreak to a limited area.

The exodus of Canadian university graduates to the United States is not as serious as it is held to be in some quarters, according to Sir Robert A. Falconer, president of Toronto University. He estimates the number at about ten per cent.

Some very satisfactory bags of ducks have been reported since the season opened, and those who have dogs are also successful in locating Hungarian partridge. On the whole, however, both classes of game are far from being plentiful.

Another case equivalent to the one King Solomon so adroitly settled has developed in Cleveland, where the hospital authorities are accused of switching infants on either two or three mothers. At latest reports the difficulty was unsettled.

Rev. S. E. Hunt attended the Presbytery meeting at Claresholm on Tuesday of last week. Rev. J. N. Brunton of Vulcan was elected chairman of the Presbytery for the ensuing year. The next meeting will be held at Nanton on October 31st.

The Board of Railway Commissioners announced the following fall sittings in Western Canada: Sept. 30, October 10; Edmonton, October 12; Vancouver, October 19; Victoria, October 22; Nelson, October 25; Lethbridge, October 27; Calgary, October 28; Regina, October 31; Brandon, November 1; Winnipeg, November 2; Fort William, November 5.

Delegates from Champion to the W.I. constituency convention, held recently at Camrose, were: Mrs. B. Hummel, Mrs. J. N. Beaubier, Mrs. U. G. Anderson, Mrs. G. F. Smith, Mrs. F. Caldwell and Mrs. F. C. Alcock. Mrs. Alcock, the retiring constituency convenor, was presented with a splendid wrist watch as an appreciation of the excellent service she had rendered to the W.I. during her six years' term as constituency convenor. Miss McMillan made the presentation.

BORN—On Friday, September 16th, to Mr. and Mrs. Little, a daughter.

Mr. Herbert Willis is making rapid progress towards recovery after an operation at the Holy Cross hospital in Calgary.

J. D. McDougall returned home on Saturday from Calgary, his progress since the recent operation having been extremely satisfactory. He is receiving the congratulations of his many friends on his rapid convalescence.

This year there should be little necessity of imported potatoes and other vegetables in this district, unless in the rush of wheat harvesting the root crop is left in the ground. Practically every class of garden vegetables and roots will give tremendous yields.

Hunters should take note that prairie chickens are protected this year. These birds have been growing scarce, and the closed season is for the purpose of giving them an opportunity to increase their numbers. To those who know what splendid sport these game birds furnish there will need to be nothing further said.—Lethbridge Herald.

What a whale of a difference a few words make! In reporting the marriage of James Groves to Miss Opal Bassett the Albertan stated that Miss Bassett was married to Mr. and Mrs. L. M. Groves. MacLean's Magazine promptly copied the paragraph under the caption "Marrying into the Family." The omission of four words made all the difference.

Appointment of a Western farmer to the Board of Railway Commissioners in place of Commissioner Boyce, whose term expires in October, is being urged by the Canadian Council of Agriculture in communications forwarded to the Federal Government. The Council has also suggested that the membership of the Board should be enlarged to seven and that at least three members should be from Western Canada.

The labor shortage in the present harvest seems to be increasing as the days go by and will undoubtedly be an outstanding feature of the situation when threshing starts. So heavy is the crop that where two men could stock an acre in other years it now requires three men at least to do the same work. The men, too, are fewer in numbers this year, a possible result of two wet falls experienced here in '25 and '26.

On account of the epidemic of infantile paralysis, the opening of the fall term of the Provincial Normal school, which was to have taken place next Tuesday, has been deferred until October 3 by order of the Provincial Department of Education. The opening of the Camrose Normal School has been deferred also. Arrangements for sending deaf students from Alberta to the institution for the deaf in Winnipeg, have been postponed to an indefinite date for the same reason.

It isn't always the number of industries which counts. In 1871, Canada had 2,255 flour mills which employed 4,992 people and produced four products worth \$39,000,000. In 1925 there were only 1,310 mills, employing 6,166 people, but they produced flour products valued at \$187,000,000. Now couldn't some politician for a purpose make a big noise about there being 96% less flour milling industrial plants in 1925 than way back in 1871, just four years after Confederation?—Lethbridge Herald.

On Monday and Tuesday the number of farmers who had finished cutting wheat began to increase rapidly, and a large number are now through with the exception of other grains. Preparations for the beginning of threshing the first of the week are reaching completion rapidly and a number of machines will start at that time and in the day or two following. Despite the more or less unfortunate weather experienced during last week the present crop promises to be the best ever harvested here.

### Good News For The Housewife !

We have just installed this week a new Electric Coffee Grinder, and now you can get the best grade of Coffee on the market for the same price you have been paying for a cheaper grade, put up in packages and tins.

We carry in stock the following three lines of Bean Coffee ready for the grinder:

"Santos," a real Bean Coffee for the price, per lb. 50c  
"Barboza," the medium priced Coffee, at per lb. .60c  
"Choice," the best that can be purchased on the market and better than any 75c coffee put up in tins, for per lb. .70c

### Shopping Advantages in Our Grocery Dept.

For Friday and Saturday

Apples, Wealthy, a good cooking and eating apple, per crate.....	.32 35
Prunes, Yakima, per box.....	1.25
Peaches, Washington, per box.....	2.15
Royal Crown Soap, 6 bar carton.....	.25
Pineapple, Singapore, No. 2 tins, 6 for.....	.95
Malt and White Vinegar, for pickling, per gal....	.90

DON'T FORGET US WHEN YOU NEED MEN'S WEAR.

WE CARRY THE STOCK.

Issued every Thursday morning from the office of publication at Champion, Alberta.

Subscription \$1.50 per year, payable in advance.

## ADVERTISING RATES

Legal advertisements 15 cents per line for first insertion, 12 cents per line for each subsequent insertion.

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding one inch, 5¢ cents for first insertion 2¢ cents for each subsequent insertion.

Commercial rates on application.

THURSDAY, SEPT. 22, 1927

## NOTES AND COMMENT.

Even at the end of this season there is little doubt the question of the combine vs. the binder and threshing machine will still be a matter of discussion with many advocates on both sides. Combines have met with difficulties this year, the principal of these being heavy green spots in the grain which lodged and failed to ripen with the rest of the field. But there has been considerable difficulty experienced with binders, partly from the same cause. There is no possible doubt as to the saving made possible by the combine when conditions are satisfactory, but it would appear part of every average crop must be cut with binders, both because they may be used earlier and also because a certain amount of straw is a necessity on a farm for feed and other purposes. Both methods of harvesting seem to be certain to be continued for an indefinite period.

From the Good Roads Magazine comes a statement with regard to the use of sand for surfacing roads which would lead to the belief that the town council used more than ordinary judgment in the material with which improvements were made on the main street this summer. It says:

"In months past this magazine advanced the claims of coarse sand for surfacing of roads, pointing out that in many places local coarse sand or fine gravel was more readily obtainable than the kind of material now being used on the main highways of the province. On the North Cooking Lake road directly east of West Salisbury a few miles from Edmonton is an excellent example of the road surfacing qualities of fine gravel. Last fall about two miles of the clay road bed at this point, particularly tough previously, received a four-inch layer of fine gravel hauled from a deposit on the farm of George Ball, pioneer stockman and farmer, nearby. The result this season has been one of the best stretches of road in the province, none, despite the fact that heavy traffic continues over the road during the abnormally wet spring and early summer. Efforts are now being made to have the government use this material to surface the Cooking Lake road from West Salisbury to Edmonton. The experiment would well worth while and enable a cost and traffic sustaining comparison to be made with the Calgary and Fort gravel highways."

While the shipping of cream to creameries eliminates a lot of work on the farm, it has also assured a shortage of butter during the fall and the consequent purchase of large quantities of creamery butter at a much higher price than was realized for the cream at an earlier period in the season. Even the shipping back and forth of butter and cream increases the expense to a very noticeable degree and the farmer and threshers who must provide for a large number of men at this period must regret the days when the butter was packed at home.

Elk have become so numerous in Northern Saskatchewan that an open season permitting licensed hunters to take not more than one adult male animal each has been declared this year. The animals are increasing rapidly in numbers, and unfortunately their choice of locality brings them into conflict with agricultural development, and repeated and serious complaint is made by settlers throughout much of their range of great damage being wrought to standing crops and to crops in stock.

The effort for lower coal rates to the East have been entirely abandoned since the adverse ruling of the board of railway commissioners, and it is quite possible the government may undertake to furnish a solution which will allow Alberta coal to move eastward in sufficient quantities to aid materially in providing steadier work for the coal miners of the province.

The charge has been made that Canadian immigration authorities have been favoring south of Europe rather than British and Nordic immigrants. The truth of the matter would appear to be that more immigrants naturally offer from the more disturbed areas than where existence is more of a certainty.

Cheap and Effective  
A "Want" Advt.

## Found

West of town, glass and rim of an auto lamp. Owner call at Chronicle office.

## For Sale

25 Remington high power rifle, case and 90 rounds shells. Apply at Chronicle office.

## Lost—Reward

In Champion vicinity side curtains for New car. Return to J. M. McFatty's Hardware and receive reward.

## For Sale

15-27 Case Engine and 20-46 Case Separator. A sum of \$1500.00. Apply to C. M. Graslin, Champion.

## For Sale

Banjo, just new. Cost \$17. for sale for \$10. Phone 44 or call at Chronicle office. Also a good saddle for sale cheap.

## For Sale

Two City Separator, 28 inch, steel frame, 14 ft. extension feeder. For particulars apply to Irvin Fisher.

## VILLAGE OF CHAMPION

## Gasoline Engine and Electric Light Generator For Sale

The Village of Champion offers for sale a 12 H.P. throtle governed Fuller & Johnson Gasoline Engine and Electric Light Generator, now located in the Village Curling Rink.

Interested parties please enquire at the office the Secretary of the Village.

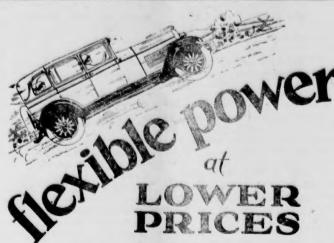

H. COOPER, Sec-Treas.

## MORE POWER

This Graph tells the whole Story in "Two Lines"

No automobile, regardless of its cost or equipment with the most perfect type of motor, can compete with the penalty of loss in power, loss in efficiency, loss in economy, the first day it begins to run...

With Willys-Knight, the direct compression engine, you get the maximum power, the minimum weight. It goes in engine efficiency. It goes in economy. It goes in comfort. It impresses us. The only motor mechanism we know that is to a limit never yet reached, just reaches every mile. In flexibility—acceleration—climbing power—economy

and low depreciation—this type of car is without rival.

Willys-Knight is enough to assure your engine in safety and service. Lower, more graceful lines. True styling. More room. More room. More room and more comfortable interior. More room.

And how—Ownership of a Willys-Knight is made easier than ever before. You can buy a Willys-Knight and pay as little as \$1000.00. And when you sell your automobile will bring in the result of model income.

Low depreciation—this type of car is without rival.

Willys-Knight is enough to assure your engine in safety and service.

# RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good.

## Fight the Fire Fiend

The week commencing October 9 has, by proclamation published in the Official Gazette at Ottawa, been declared Fire Prevention Week throughout Canada. The object is, of course, to focus public attention upon the enormous losses, both in life and property, which have been incurred through the action of more than 100,000 incendiaries against fires, and to educate all persons, especially children, against habits of carelessness in the handling of matches, gasoline and other combustibles, and in the disregard of common sense methods in the matter of extinguishing camp fires, and such simple matters as throwing away the still-lit stubs of cigars and cigarettes.

It is well known that the most effective method would seem to be quiet education, but it is also well known that governments to effectively set up a fire prevention campaign must put out every fifth fire for the avowed purpose of teaching a presumably intelligent, educated and business-like people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire prevention proves conclusively that it is only too necessary to keep up a persistent campaign to awaken the people from their apathy and indifference to the very real danger.

Canada, while she is progressive in many ways, and has taken the leadership in numerous, worthwhile movements, and can claim the honor of achievements, occupies a low place among the nations of the world when statistics of fire losses are studied. Few countries, if indeed any one, annually suffer greater property losses than those which take place in Canada. This Dominion's fire loss per head of population is about the highest in the world, and the passing years do not reveal much improvement.

Canada has already suffered the loss not merely of millions but actually billions of dollars worth of forest wealth, some of which is gone forever, and where long periods of time will be required to make good the loss. The forests of the north are one of Canada's greatest assets—one of the potential factors today, and for the future, in taking up the cause of the Dominion's greatest industrial enterprises and providing a very big percentage of the Dominion's export trade.

The fire fund takes a yearly, monthly, almost daily toll of human life, as well as leaving behind a trail of terrible suffering and economic loss in its wake.

Besides the high ratio of fire losses, the people of Canada have to pay abnormally high rates for fire insurance. The insurance companies are not to blame for demanding high premiums. They must protect themselves and their policy holders, and just so long as fires in Canada remain so numerous and costly, so long will they demand high premiums.

Then, too, there is the heavy burden imposed upon all urban communities in the maintenance of elaborate and expensive fire-fighting equipment, and large expenditures to augment water supplies for fire-fighting purposes, mainly in excess of the daily domestic requirements of cities and towns.

All these forms of protection are necessary, and must be paid for in our bills. But because of the frequency of fires largely the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be maintained on a much more extensive and expensive basis.

Fire Prevention Week should, therefore, be observed all over the country. Special attention should be paid to the subject in all schools, while each individual household should devote a little time to a thorough examination of his premises and make a close check-up of conditions in and around all buildings. Every home, whether it be a house or an apartment, should have a gasoline and oil safety device installed, and every member of any family taught to exercise the greatest care in handling of matches and all combustible materials. Lighted lamps, and in the making and extinguishing of fires. Finally, all property should be adequately insured, provided all precautions that may be taken.

Attention to these important matters now may save much loss and suffering in the future.

## Giant Dirigible Damaged

**Expansion Of Gas Through Weather Conditions Causes Peculiar Accident**

A peculiar accident to the giant dirigible Los Angeles occurred while the huge airship was moored at her mast in Lakewood, N.J. The temperature rose suddenly, causing the helium gas in her bottom tanks to expand rapidly, and the wind shifted 180 degrees in a few seconds. The result was that the ship threw her stern high into the air, almost at an angle of 90 degrees, and then, with the wind, with the valances torn in the wind. The temperature went back to normal rapidly, so that the gas was

reduced to its normal volume and the tail of the ship dropped down. Meanwhile, however, loose gas in the ship was thrown about, causing some damage.

## French Use Bicycles

**Report Shows They Out-Number Automobiles Ten-To-One**

The number of bicycles in use in France for 1925 and 1926 is 7,112,000, an increase of 5 per cent for 1925, according to French Commissioner Louis Hall, Paris, in a report to the Detroit office of the Department of Commerce. In 1924, there were about half a million bicycles not used in Greater Paris, the Department of the Seine having 475,665 registered, or two to every eight inhabitants. In the highly industrial departments of northern France, a total of 55,000 bicycles are in use to one to every five inhabitants. There are 10 times as many bicycles in France as automobiles.

## Reconstructing Ruins in Palestine

**There is no country where the excavations are so busy as in Palestine.**

The traveller to the Holy Land will find many evidences of the past in the form of ancient Capernaum, the synagogues in which Christ preached, and the like, nearly two thousand years ago. At the present time, archaeologists and others are busily engaged in reconstructing from the ruins the place of worship which the centurion of the Gospel built for the Jews, the very one in which our Saviour taught.

## Get Rid of HEMORRHIDES (Piles)

Surgical operations for the relief of piles can be avoided by the use of Analol Suppositories.

Your best assurance of their remedial effectiveness is the fact that Analol Suppositories have had a remarkable record of success in the treatment of this painful condition.

Analol Suppositories, made from the Anodal formula, safe for people of every age. Sold only in red Minx boxes.

Ask your druggist or write us for a descriptive pamphlet for \$1.00. Cushing & Evans' Analytic Company, Utica, New York.

**ANASOL SUPPOSITORIES**

W. N. L. 1699

## Will Plead European Cases In European Courts

**American Women Attorney Going To Paris, Athens and London**

An American woman attorney will try cases in Paris, Athens and London while on a "circuit." She is Miss Grace M. Brown of Detroit, who chose to go to Europe next to 1927 but has legal plans. Paris Miss Brown will represent an Armenian claiming \$500,000 from the Turkish Government for land which was confiscated by Turkey and retained in an immigration case in Athens and an involved suite will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

## Toes Kept Free From Sore Corns

When you notice any sign of callous on the feet or toes—that's the time to use a few drops of Dr. Thomas' Corn Extract. It removes corns and prevents corns. No matter if the corn is hard or soft. Let it be on or off the toe, heel or ball. It will remove it without pain, faster than Dr. Thomas' Corn Extract. It does the work and cuts out the corn.

## Self-Sustaining Air Service

Automobiles and trucks imported during 1926 in the Empire were in Canada—from Halifax to the Royston, and from Sioux Lookout to the Red Lake mining fields. These are an absolutely commercial basis and have had no Government subsidies.

## A PERFECT MEDICINE FOR LITTLE ONES

### Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They contain the finest ingredients which regulate the bowels, sweeten the stomach, drive on digestion, relieve colic, cure diarrhea, stop severe fevers and promote healthful refreshing sleep.

It is impossible for any new-born babe as they are absolutely guaranteed free from colic or any other disease.

"White Germany has lost its mon-

ey of dye, it is developing other processes that need great improvements to modern beauty. This trial is said to be produced synthetic gossypol on a commercial basis."

## Canada Favored For League Seat

### London Paper Says Dominion Well Positioned

The London Observer, commenting on Canada's candidacy for a seat on the League Council, says it would be hard to pick another candidate more promising. It adds: "The principal reason was the warmth shown of Canada's capacity for international service and she has played other parts since then."

In India and Indonesia, to name two foreign continents, the Observer says, Canada high in the list of candidates, and above all, will be invaluable for the league to have for the first time a direct representative from North America upon the council.

It Will Prevent Ulcerated Throat.

At the first symptoms of sore throat, inflammation, or ulceration, take a spoonful of Dr. Thomas' Emetic Oil. Add a little warm water and gargle. This will soothe and relieve the irritation and prevent the ulceration and swelling that are usually subject to galley here that make themselves immune to attack.

## Antiseptic Perfumes

### Perfume and Toilet Preparations Have Distinct Antiseptic Value

More important than the antiseptic action of perfume is the disinfecting action of the perfume itself. The effect on the mucous system is the hydrolic value of a perfume and a toilet preparation, states the R.R.L. service, a popular perfume recently added. Not all perfumes have aromatic substances and such are germicidal. The use of perfume no doubt lessens the infection that threatens in crowded covered spaces even as carbon tetrachloride, chloroform or ether of lime. Alcohol between 60 to 80 per cent strength is a strong antiseptic and increases the permeable action of certain oils. Rose water belongs to the class of oil of phenol, eugenol, which can be made synthetically, is used as a sleeping powder for children and benzyl benzoate and benzyl alcohol, other synthetics, including poly-alcohols, have antiseptic properties.

## Punished For Cruelty

We wonder what some of our country would do in case of ten dollars and costs of twenty-five more for searing a live carp with a carbuncle. Yet this was the punishment imposed upon a man in the English Police Courts. Some people think a such is not an ample punishment.

## The oldest university in the world

is that at Pavia in Italy, founded in 855 A.D. by Lothair, grandson of Charlemagne.

One day's exercise with a wood saw is worth two weeks of physical culture.

Write Dr. Pierce's Invalids' Hotel, in either liquid or tablet form. Write Dr. Pierce's Invalids' Hotel in Buffalo, N.Y. If you desire Dr. medical advice.

Drives away pain — Minard's Liniment.

## Clean to handle, Sold by all Druggists, Grocers and General Stores

### Coal Not Merely a Fuel

#### German Scientists Discover Many Valuable By-Products

European scientists appreciate that coal is not merely a fuel but contains raw products to make things. Dr. Thomas S. Clark, president of the Carnegie Institute of Technology, upon his return from a trip abroad.

Coal's potentialities, particularly in the German Empire, Dr. Clark says, are almost unlimited. In 1926 the Empire were in Canada—from Halifax to the Royston, and from Sioux Lookout to the Red Lake mining fields. These are an absolutely commercial basis and have had no Government subsidies.

So great is the interest in coal's potentialities that it is being developed in every field.

"A great deal of research interest is being given to coal-tar chemicals," Dr. Clark said.

"While Germany has lost its mon-

ey of dye, it is developing other processes that need great improvements to modern beauty. This trial is said to be produced synthetic gossypol on a commercial basis."

So great is the interest in coal's potentialities that it is being developed in every field.

**Base In Near East**

**British Playing Gns. At Malta To Protect Suez Canal.**  
The British air ministry is said to be planning development of a great air base at Malta which will dominate the Eastern Mediterranean and will protect Egypt and the Suez Canal interests.

This is also regarded as a precursor in view of Premier Musolini's plan of developing a great military and naval base at Rhodes.

It is also learned that the Nizam of Hyderabad, who is reported to be an semi-independent native prince, is planning to establish an air service in his dominion and is sending a number of young men of the leading families to be trained in England.

While of course, the service will be paid for out of the revenue of the Nizam, it will be coordinated with the imperial service in India.

**France Raises Tariff On Canadian Wheat****Notice Of Increase Has Been Received At Ottawa**

France has increased the tariff on Canadian wheat from 20 cents to 27 cents per bushel of one hundred weight.

A protest against the increase was filed by the Canadian Trade Commissioner in Paris. The higher rate is to take effect immediately.

While Canada's export of wheat to France has increased from year to year, the present change on the basis of last year's export of 1,155,867 bushels will mean an increase in the total French duty collected on Canadian wheat.

Canada, under the 1922 treaty between the two countries, enjoys a minimum tariff and most favored nations' treatment on exports to France and the increase now placed on effect is due to the raising of the minimum tariff rate to all countries by France.

A total of 543 commercial vessels passed through the Panama Canal during the month of April, this being a new record. The previous mark was set on April 1, according to the monthly financial statement issued by the Department of Finance.

A total of 543 commercial vessels

passed through the Panama Canal during the month of April, this being a new record. The previous mark was set on April 1, according to the monthly financial statement issued by the Department of Finance.

All the inhabitants of Turkey, including foreigners, are to be confined to their homes for an indefinite period starting October 24, according to official regulations issued at Constantinople, fixing that date for the national census.

The beam wireless service to India has been opened to public traffic. The Government has issued the 1922 regulations up the British Empire beam wireless to now complete beam communication to Canada, Australia and South Africa before the end of the year.

It is reported that Japanese divers in Schenectady, Cranes, who were searching for a half-a-million sterling in gold (\$2,500,000) aboard the British cruiser Black Prince, have discovered the first gold coin. The coin bears the inscription of George III, and the date 1821.

It is expected that within six weeks it will be known whether or not oil in commercial quantities can be added to Northern Ontario's inventory of wealth, for by that time to which the provincial Government has been conducting in the Mattagami Valley will be completed and a report upon them made.

**How Hospitals Care For Patients**

Eight thousand hospitals in the United States and Canada take care of 12,000,000 patients a year. About \$200,000,000 worth of medical supplies and equipment, worth about \$100 million dollars are invested in the hospital property and in the opinion of Dr. E. S. Gilmore, head of the American Hospital Association, it now is the largest investment in the world for years of age. Unfortunately many persons seem more or less reluctantly obliged to go to spite of what hospitals can do for them.

**Rub It In For Lame Back.** A britt, rubbing with Dr. Thomas' Eclectic Oil will relieve lame back. The skin will be rubbed until the heat of the oil penetrates the tissue and bring speedy relief. Try it and be convinced. It is good for the lame back, the pain comes out and there are ample grounds for saying that it is an excellent article.

**Planes Replacing Dogs**

With aeroplanes coming into use, dogs are being used less and less on the trains. Consequently there is an over-supply and hundreds of bunks, abandoned, have reverted to the wild state and are ample grounds for saying that it is an excellent article.

## DOMINION NOW HAS A SEAT ON LEAGUE COUNCIL

Geneva.—Canada and Cuba were elected to the League of Nations Council, and were the first to be filled, and Finland got the third.

Canada, Cuba and Finland will sit for three years on the council, which now is composed of 14 members. The others are Great Britain, France, Italy, Spain, Germany, which hold permanent seat in perpetuity, and China, Colombia, Chile, Romania, Poland and Holland, who are non-permanent members.

The new member states say that the council represents four principles representing the American continent and has created special interest among many delegates because of the particularly friendly relations existing between Canada and the United States. From another standpoint the election caused interest of an equally Canada is a member of the British Empire. Hence, in the view of numerous delegates, the influence of the British Empire on the council is increased, although the general impression exists that Canada will act absolutely independently, insisting upon her sovereign rights as an independent member of the League of Nations.

The three new members will take office immediately, replacing Czechoslovakia, Salvadora and Belgium, whose term has expired.

President Senator Ionand Dundas will represent Canada on the council. He was president of the 1925 Assembly; he speaks English and French with equal fluency and is popular throughout the Americas.

Dr. Aristides Aguirre Behancon, Minister to Berlin, probably will be the choice of Cuba. He has long been one of the most prominent figures in Cuban activities and served as president of the recent International Conference on Transit and Communications.

Canada won her victory by a narrow margin, getting 26 votes or one more than the necessary majority; Cuba led the poll with 40 votes, and Finland came second with 25.

## No Alberta Coal For Ontario

Funding Of Rail Commissioner Will Make Price Prohibitive

Calgary.—The finding of the commission at once kills all hope of sending coal to the Ontario market.

"It would be useless," said James Gonge, Drumheller operator.

Mr. Gonge said that to the \$12,200 ton mentioned as the inclusive cost "plus a reasonable profit," would be added the extra cost of coal which at \$3.75 per ton would bring the figure up to \$15.50. To that again would have to be added the profit of the retailer in Ontario, which would bring the total to \$25 per ton.

The world's coal and oil and Alberta coal could not meet the Ontario consumer \$18.45 to \$18.50 per ton, at which figure it would be placed entirely out of court, as American anthracite coal was being sold from \$15 to \$16 per ton.

"There is now no hope of capturing the Ontario market for Alberta coal," said Mr. Gonge, "as this could not be done unless there was a flat rate of \$7 a ton established."

## Insured For Millions

157 Persons In U.S. And Canada Carry Heavy Policies

New York.—The lives of 157 persons residing in Canada and the United States are worth \$100,000,000 or more each, according to companies willing to insure people made by the Specialty Company.

Indiaman Wauhawen, merchant heads the list with \$7,500,000 in policies. Several persons including Dr. F. G. Banting, of Toronto, discoverer of insulin, are insured for \$500,000 each.

## Farmers Seek Representation

Winnipeg.—Appointment of a western farmer to the Board of Trade, which Bayes, who term will expire in October, is being urged by the Confederation in place of Canadian Council of Agriculture. In communications forwarded to the council, the confederation pointed out that the board should be enlarged to seven, and that at least three members should be from Western Canada.

The most illiterate country in the world is Nata, Africa, where 94 per cent of the natives can neither read nor write. Egypt and Guatemala have 92 per cent illiteracy.

## Good-Will Between Canada and U.S.

No Room For Distrust Says Hon. William Phillips

Ottawa.—There is no room for distrust or unfriendly feelings between Canada and the United States, declared Hon. William Phillips, U.S. minister to Canada, in the course of a stirring address to the annual Canadian Club dinner deferential to the annual conference of the Association of Canadian Clubs, at a luncheon here.

"It is an easy matter for us to understand one another," he said, "but we must be good neighbors. We are opposite and because already we are thoroughly well acquainted. We are in no sense foreigners to each other, yet we still have much to learn, one from the other. Already we have gone a great way in our efforts to promote closer co-operation but we still can go even further."

"Much of the sorrows and sufferings of the world would have been avoided if there had been greater understanding between Canada, Cuba and the United States. From another standpoint the election caused interest of an equally

Canada is a member of the British Empire. Hence, in the view of numerous delegates, the influence of the British Empire on the council is increased, although the general impression exists that Canada will act absolutely independently, insisting upon her sovereign rights as an independent member of the League of Nations.

The three new members will take office immediately, replacing Czechoslovakia, Salvadora and Belgium, whose term has expired.

## Liable To Dumping Duty

New Rules On Imported Apples Has Been Issued

Ottawa.—Imported apples have been declared liable to dumping duty under rules issued by the Department of National Revenue holds that apples are to be considered as a class of kilogramme fruit in Canada until otherwise ordered.

This means that a special (or dumping duty) in addition to the regular duty, will be applied to imported apples. The dumping duty will be based on the difference between the appraised value and the purchase price but not exceeding 15 per cent of the appraised value.

For fiscal year which ended March 31 last the returns are being made and the deficit is placed at \$1,600,000. The estimated shortage was about \$2,500,000.

It would appear from these figures that the importation in the current year has increased the volume of

smuttiness, a marked increase in the pants paid in recorded a big increase in the number of pants.

Under these circumstances it appears that the new conditions will be helpful to the department in a year or two at least equilibrium will be established between postal revenues and expenditures.

## Typhoon Devastates Japan

Four Hundred Dead and Many Injured

By Eddie Wave

Tokio.—Four hundred persons are dead, 2300 injured, and 700 homes destroyed in Kumamoto, Island of Kyushu, in consequence of typhoon and tidal wave accompanying the Japanese typhoon.

In Fukuoka, Nagasaki, and Kansai prefectures there were few casualties, but numerous houses were inundated and damaged.

When the typhoon struck Tokio yesterday it was reported that three lives were dead, three children were injured when the roof of a schoolhouse was blown off.

## Flee From Earthquake Area

Tourists Along Black Sea Coast Crowd All Transport

Moscow.—Thousands of panic stricken tourists along the Black Sea coast were crowding all means of transportation in order to escape from the district which has been shaken by earthquakes in the past few days, causing death and injury in hundreds.

Local authorities in the city of Batumi, 12 persons have been killed there and 355 injured. Slighter shocks still continue in the region, the advice still continuing in the region, should lead to safety measures are under way.

## Should Lead the Way

St. Gallen, Switzerland.—The United States, France, Germany, Japan, Holland and the other drug manufacturers of producing countries should be invited to the conference of narcotics in the opinion of Colonel Daniel W. McCormack of Boston, technical adviser of the Peruvian government, as expressed on behalf of Peru before the League of Nations' world welfare committee.

## Former Killed By Airplane

Montreal.—Charles L. Hart, a passenger and pilot, was taking off from an airfield, struck his farm wagon.

Norman Hopkins, 26, farmer, was killed. Hopkins' two sons, Glen, 6, and Oscar, 9, who were riding in the wagon, were injured.

## Next Meeting At Edmonton

Saint John, N.B.—Edmonton, Alta., was chosen for the next annual meeting of the Associated Workers' Compensation Boards of Canada here.

Dr. J. E. Stirling, of that city, was elected vice-president.

## For Outpost Work

Mountie R. T. Terpiloff

Ottawa.—A nurse recently to begin work at the new medical outfit, All Saints' hospital, Aklukivik, North West Territories, which has been opened under the auspices of the Mackenzie River diocese of the Anglican church.

## POSTAL DEFICIT MUCH SMALLER THAN EXPECTED

Ottawa.—Reduction of postage rates provided by the budget of 1926 resulted in a deficit of \$1,000,000.

Postmaster General H. W. Wright and Ernest Roy, express manager, appreciated the work done by postal, air-mail and others associated with the work of the post office during the months of the year which prepared and submitted to the Governor-in-Council, the investigation had been very white, said the chief commissioner.

Figures shown above all appear to have been necessary under the circumstances," he said. "In the first place, an expense of conditions as they actually exist have made it unavoidable for letters, air-mail and airmail services to increase the volume of

smuttiness, a marked increase in the pants paid in recorded a big increase in the number of pants.

Under these circumstances it appears that the new conditions will be helpful to the department with the ability and determination to bring about the necessary reforms. There is every indication that the present head of the department is a man."

## Exodus Not Serious

Only Ten Per Cent Of University Graduates Go To States

Winnipeg.—The exodus of Canadian university graduates to the United States was not serious as it has been to be in recent years.

Dr. Robert A. Falconer, president of Toronto University, in an interview here, said:

"I went into the entire universities

at all times and found, according to figures I get from various universities in Canada, the emigration of graduates did not exceed 10 per cent."

Dr. Robert added that the number of students leaving as some pecuniary incentive, it supplies an outlet for our graduates." No one, he said, would bother to obtain a university education if they did not get the opportunity to use it.

## Projected Flight Cancelled

American Globe Cycling Tour To End At Tokio

Tokio.—The projected flight of the American machine pride of Detroit neared the Paule on its return to America.

It was called off by its captors, Edward F. Schles and William S. Brock.

The decision to call off the flight followed a lengthy conference

between the two Americans and others in the field.

They will take an early boat for the United States and have their monoplane shipped home.

## More Settlers For Labrador

Leighbridge.—The Canada Colonization Association has been so successful in the Leighbridge district that it has been decided to move another 25 families to the area.

Each family has a plot of 100 acres.

They will take an early boat for the United States and have their monoplane shipped home.

## Sittings Of Railway Commission

Ottawa.—The Board of Railway Commissioners announced the following dates for sittings in Western Canada:

Calgary, Oct. 12; Vancouver, Oct. 19;

Victoria, Oct. 22; Nelson, Oct. 24;

Lethbridge, Oct. 27; Calgary, Oct. 25;

Regina, Oct. 31; Brandon, Nov. 1;

Winnipeg, Nov. 5; Fort William, Nov. 5.

## Should Lead the Way

St. Gallen, Switzerland.—The United States, France, Germany, Japan, Holland and the other drug manufacturers

of producing countries should be invited to the conference of narcotics in the opinion of Colonel Daniel W. McCormack of Boston, technical adviser of the Peruvian government, as expressed on behalf of Peru before the League of Nations' world welfare committee.

## Former Killed By Airplane

Montreal.—Charles L. Hart, a passenger and pilot, was taking off from an airfield, struck his farm wagon.

Norman Hopkins, 26, farmer, was killed. Hopkins' two sons, Glen,

6, and Oscar, 9, who were riding in the wagon, were injured.

## Next Meeting At Edmonton

Saint John, N.B.—Edmonton, Alta.,

was chosen for the next annual

meeting of the Associated Workers'

Compensation Boards of Canada here.

Dr. J. E. Stirling, of that city, was elected vice-president.

## Indian-Paleface Romance

This little girl is evidently attracted to the small Indian boy and

perhaps even more to the curious and unusual house he lives in—a typical

Stone Indian Tipi. She has mastered her dexterity and is tempting him

with a few candies. The Little Chief is nothing loath to be tempted and meets her near halfway. This pretty little incident occurred during the great Indian Day Celebrations at the Ha Ha Spring Hotel recently and was fully registered by a CPR photographer.

## TAKE MEANS TO PUT AN END TO CUSTOMS FRAUDS

Ottawa.—"We have had some evidence brought before us to indicate that in certain quarters there would be a desire to get rid of our customs service," said our minister to the effect. "For the benefit of such parties and others similarly disposed I think I can assure you that other means will be devised and adopted to detect such frauds, and that in due course when such fraud and illegal practices are discovered, they will be visited with swift and relentless punishment."

The above was one of the statements made by Hon. H. W. Wright, chief commissioner of the Royal Canadian Mounted Police, in a brief address at the close of the public sittings of the commission here.

"To do this, we have been compelled to have the help of the public," he continued. "For such a task we have far exceeded our powers and responsibility, but we can take no action without the aid of the public."

The chief commissioner's closing address, which was introduced by Mr. Wright and Ernest Roy, express manager, received普遍 appreciation of the work done by postal, air-mail and others associated with the work of the post office during the months of the year which prepared and submitted to the Governor-in-Council, the investigation had been very white, said the chief commissioner.

## Depot Should Be Lighted

Considerable interest has been aroused by the failure of the C.P.R. to install electric lights at the station and the matter has been taken up vigorously by the town council and others. With two trains during the night and a high and dangerous platform to negotiate in the dark, it is felt that public safety demands the installation of electric lights now that they are easily available.

## Scottish Entertainer Coming Oct. 10

The Ladies' Aid have arranged for the appearance here on October 10th of Tom Copeland, famous Scottish entertainer and his assistants. The program will consist of straight songs, comic songs, piano eccentricities, violin strathpey, monologues, bag pipe story and dance, etc. Admission, adults 50c; children 25c.

### Card of Thanks

Mr. J. D. McDougall wishes to thank the Ladies' Aid and Women's Institute and the many friends who sent him flowers during his recent illness, and also the many friends from Champion who so kindly visited him.

## Pay Village Taxes Before October 9

October 9th will be the last day on which discount will be allowed on current Village taxes.

## Use of Motor Power Increasing Rapidly

The transition from horse to motor power has made very rapid strides in this part of Alberta during the past few years but at no time has the change progressed as it has this summer and fall. Motor trucks are being purchased in unusual numbers and it will be but a short time until every farm will have one or more of these in service. Tractors are also being used in increasing numbers and while it will be a long time before horses are discarded altogether, such a result would seem to be a certainty of the future.

### DON'T CUT OFF SWITCH

(Good Roads Magazine)

Coupling with the car in gear and the ignition switched off commonly is supposed to increase the resistance of the engine to the forward movement of the car. The increase is negligible and the result of the practice may be disastrous. Even with the throttle closed in such a case gasoline is admitted to the cylinders and, unexploded, it condenses and drops down the cylinder walls. Thus, it washes off the oil by which the pistons are lubricated. The potential damage of such a practice is obvious. It should not be exercised.

## Infantile Paralysis Still in Evidence At Scattered Points

The epidemic of infantile paralysis seems to be invading new territory as the days go by. This dread disease has occurred in isolated instances for many years in this western country and its virulence and contagious qualities were well known and dreaded. It is doubtful if anything equal to the present situation has occurred previously. Cases are reported from Boston on the Atlantic coast and Vancouver on the Pacific, with a sprinkling of cases in between. Up to the present time it seems to be spreading in Alberta and British Columbia, appearing at widely different localities without any apparent connection between. It is to be hoped the strict precautions being taken will result in the disease being brought under control in the immediate future.

### J. G. HARPER

Musical Director of  
THE LETHBRIDGE CONSERVA-  
TORY OF MUSIC

Teacher of Violin and all other  
Stringed, Plectrum and Band  
Instruments.

Will be in Champion every  
Wednesday.

For particulars telephone Mrs.  
C. McLean, Phone 26, or Mrs.  
W. C. Hoskins, Phone 28.

## Immigration Data Is Disturbing

The intimate modification of the agreement between the immigration department and the railways respecting the carriage of immigrants is upon the fact that the southeast Europeans materially exceed the Nordic stock. In the first four months of the fiscal year, 47,000 non-British foreigners entered Canada, which is an increase of 20,000 over the corresponding period. On the other hand, the English numbered 10,167; Scotch, 9,987; Irish, 5,959; and Welsh, 1,152. The 47,000 immigrants who came from Europe and Asia compared with 32,516 from the British Isles. Of those who have come since April, Nova Scotia got 1,180; New Brunswick, 1,019; Prince Edward Island, 185; Quebec, 9,102; Ontario, 23,930; Manitoba, 31,934; Saskatchewan, 3,793; Alberta, 8,333, and British Columbia, 5,916.

See THE GREATEST  
*Value* IN CHEVROLET  
HISTORY

QUALITY always  
comes first with Chev-  
rolet. And never be-  
fore has the Chevrolet insis-  
tence upon quality been so  
strikingly exemplified as now.

Improvement where improvement was possible!  
Refinement where refinement could be made!  
Grace and beauty added to the Chevrolet quality  
of rugged endurance! Chevrolet has left no stone unturned in the building up of Chevrolet  
QUALITY—the quality which has won Chevrolet the greatest automobile sales volume in  
the world today.

And, Chevrolet has used its popularity, its  
huge production, its vast resources, to effect  
substantial savings in purchasing and manufacturing  
costs—and Chevrolet is sharing these new  
savings with the buyer, in the form of new and  
lower prices.

Come in today. Learn that the Most Amazing  
Quality and the Lowest Prices in Chevrolet His-  
tory constitute the greatest Value that even  
Chevrolet has ever offered.

quired in your office—Chronicle.**

### Notice to Advertisers

In future all copy for change of advertisements must be in this office by six o'clock on Wednesday night, or the previous week's advertisement will be run. Notice of any change of space occupied must be received by Tuesday night to insure such change being made. New advertisements will be taken as late as possible on Thursday morning. Positively no exceptions will be made.

There is no intention of embarrassing advertisers by this

decision, but copy has been reaching this office in a way to make it impossible to issue on the proper date. If a later date of issue is desired by the majority of advertisers this date of publication copy must reach this office at the times named.
